PROFILE

Detail-oriented and innovative Associate Frontend Developer with 1 year of experience in building responsive, user-friendly web applications. Proficient in Next.js, React.js, JavaScript, and modern UI/UX principles. Passionate about creating seamless user experiences and optimizing web performance. Passionate about creating seamless user experiences and optimizing web performance. Seeking to contribute my skills to dynamic projects and grow in a forward-thinking team.

WORK EXPERIENCE

ASSOCIATE FRONTEND DEVELOPER
STRASTAN SOLUTIONS CORP

2024 - Present
At Stratsan Solutions Corp, I develop and enhance frontend web applications, ensuring responsive and user-friendly interfaces. I collaborate with designers and backend developers to optimize performance and user experience. Additionally, I mentor new developers, uphold coding standards, and work with leadership to resolve design and functionality issues

FRONTEND DEVELOPER INTERNS
STRASTAN SOLUTIONS CORP

2023 - 2024
As a Frontend Developer Intern, I assisted in developing and optimizing web applications, ensuring responsive and user-friendly designs. I collaborated with senior developers to implement UI components and improve performance. Gained hands-on experience in modern frontend technologies and best practices.

INTERESTS

- Exploring new web development trends
- Solving Coding Problems
- Watching tech-relates content
- Experimenting with UI/UX designs
- Engaging in team collaborations

LANGUAGES

- English - B1 (Intermediate)
- Tagalog - C1 (Advanced)

PROJECTS

Organic Market Project
At Strastan Solutions, a project focused on creating a seamless and user-friendly platform for promoting and selling organic products online.

Solutions Chapter Project
Developing a dynamic and scalable web platform using Next.js for the frontend and AWS services for backend infrastructure. Leveraging AWS Lambda, API Gateway, DynamoDB, and Cognito to ensure secure authentication, efficient data handling, and seamless performance. Focused on delivering a responsive, user-friendly experience with optimized functionality.

CMS Project
A robust CMS built with Next.js and Tailwind CSS, leveraging AWS services like Lambda, DynamoDB, and API Gateway. It offers full customization options, content scheduling, user roles, and an analytics dashboard.

Web Based Diet Diary System Project
Develop a web based Diet Diary System using PHP and MySql, enabling
efficient built-in calendar with time, menu plan and diary note

In-Demand Sales Forecasting Project
Develop a Sales Forecasting Application using PHP and MySQL to efficiently gather sales transaction data, integrate forecasting algorithms, and generate reports.
